

TEXAS DIGITAL LIBRARY

2017 annual report

The **Texas Digital Library** will be an essential resource, built by and for our institutional members, that enhances access to the unique digital collections of Texas and ensures their long-term preservation.

The Texas Digital Library will be an **essential resource, built by and for our institutional members**, that enhances access to the unique digital collections of Texas and ensures their long-term preservation.

Accomplishments

- Began implementation of new membership structure.
- Formally launched new Texas Data Repository (TDR) and formed TDR Steering Committee.
- Hosted the TDL Data Symposium in Fall 2016 and the 10th annual Texas Conference on Digital Libraries.
- Recruited one new institutional member.

Aspirations

- Re-envision training programs to leverage member and community expertise and incentivize member participation.
- Implement organizational and systems improvements to create greater efficiency and security, better project and member relationship tracking, and greater transparency.
- Keep hosted services up-to-date by upgrading all applications to latest versions.

The Texas Digital Library will be an essential resource, built by and for our institutional members, that enhances access to the unique digital collections of Texas and ensures their long-term preservation.

Accomplishments

- On-boarded nine institutional users of the Texas Data Repository and began accepting datasets for publication.
- Successfully prototyped an aggregation service for an expanded Texas hub for the Digital Public Library of America (DPLA).
- Provided access to unique research and cultural heritage collections through 19 institutional repositories and 60 online scholarly journals.

Aspirations

- Recruit four additional institutional members, increasing access to their unique collections
- Retain all current members and encourage full utilization of repository, journal-hosting, research data hosting, and digital preservation services.
- Explore HykuDirect hosting through a limited pilot project
- Transition expanded DPLA hub from prototype to production-ready service

The Texas Digital Library will be an essential resource, built by and for our institutional members, that enhances access to the unique digital collections of Texas and ensures their **long-term preservation**.

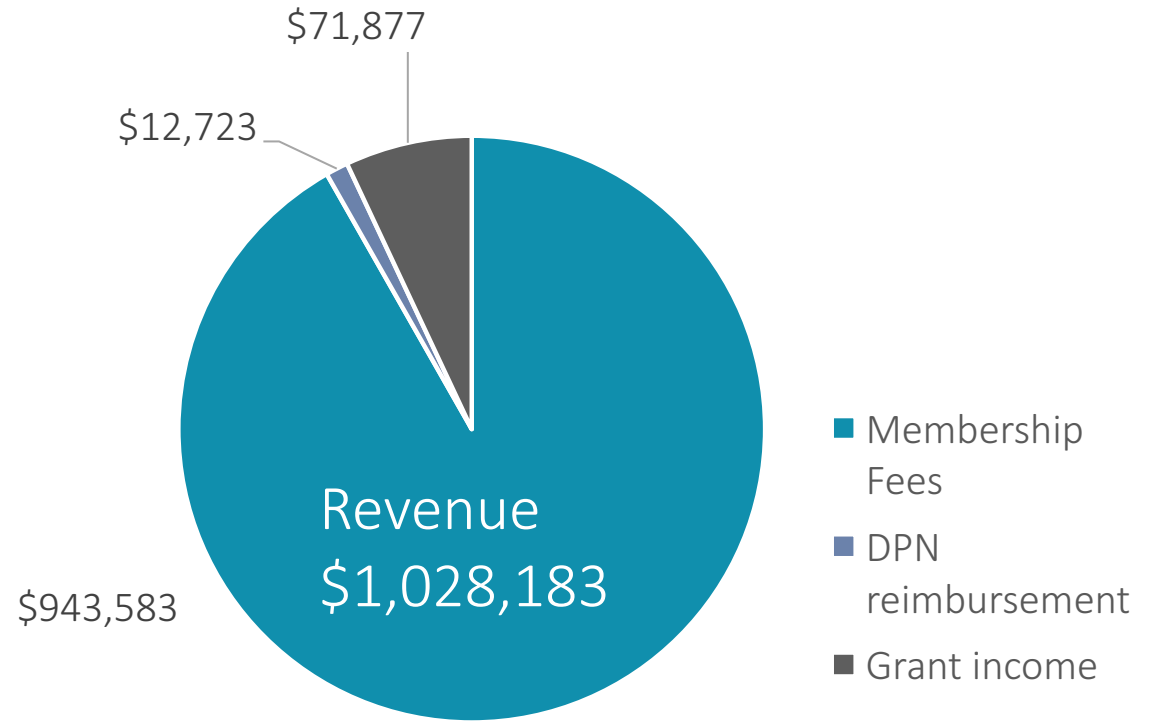

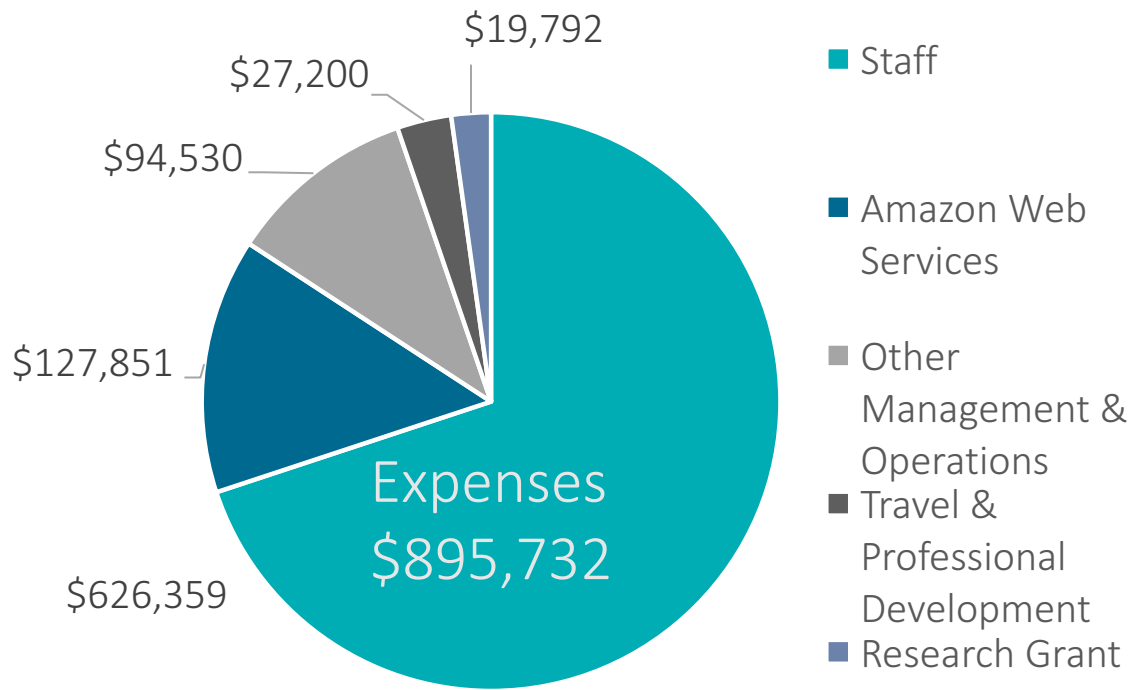

Accomplishments

- Hired digital preservation expert to manage DigiPres services and provide consulting and training for members.
- Joined the Chronopolis digital preservation network, adding another non-commercial option for digital preservation storage managed by mission-driven organizations within the Academy.
- Recruited 4 additional institutional users of TDL digital preservation services.

Aspirations

- Continue the growth in usage of our DigiPres services and make enhancements to services in alignment with technology roadmap.
- Host the Digital Preservation Management Workshop (DPMW) in Summer 2018.
