	<p><b>7:30 – 9:00 AM – Registration Desk Open</b>  J.J. Pickle Research Campus Lobby  Light breakfast will be available from 7:30 – 9:00 AM</p>
9:00 AM – 10:15 AM	<p><b>Opening Plenary (Big Tex Room 1.102)</b></p> <p><b>Welcome and Opening Remarks</b></p> <p><b>Keynote Address: Why Media Preservation Can't Wait: The Gathering Storm</b>  <b>Mike Casey, Indiana University</b></p> <p>This presentation explores the time-based media preservation problem, detailing how the forces of degradation along with rapidly advancing obsolescence issues taken together result in a short time window in which to digitally preserve audio, video, and film collections. Using a fairytale as a framework, it introduces a character named Degralescence that embodies the major forces that threaten to undermine media preservation efforts. It also proposes a timeframe within which action must be taken to avoid losing the opportunity to affordably preserve large holdings of media recordings. Using the Indiana University collections and the work of the IU Media Digitization and Preservation Initiative as examples, it explores strategies for addressing this impending and inconvenient crisis. Finally, the presentation highlights international progress with an overview of key projects and resources.</p> <p><b>About Mike Casey:</b> Mike Casey is the Director of Technical Operations for Indiana University's Media Digitization and Preservation Initiative which has digitally preserved more than 150,000 audio and video recordings. He is the co-author of <i>Sound Directions: Best Practices for Audio Preservation</i>, a contributing author to the second edition of the best practices publication <i>Guidelines on the Production and Preservation of Digital Audio Objects</i> (known as IASA-TC 04), a contributing author to IASA-TC 05 <i>Handling and Storage of Audio and Video Carriers</i>, the creator of <i>FACET: The Field Audio Collection Evaluation Tool</i> and the co-creator of the media prioritization software applications MediaSCORE and MediaRIVERS. He also authored the Indiana University Media Preservation Survey report and is principal author for the follow-up publication <i>Meeting the Challenge of Media Preservation: Strategies and Solutions</i>. His article entitled <i>Why Media Preservation Can't Wait: The Gathering Storm</i> that explores media degradation and obsolescence was published in the IASA Journal in January 2015.</p>
